

Remove & Replace Manhole Lids Safely

No More Back Injuries or Smashed Fingers!

LidUp is a complete manhole lid lifting system that is much safer in the work zone than traditional hooks and pry bars. Employees can be seriously injured during removal and replacement of manhole lids. Trips, falls, smashed hands, fingers and feet as well as serious back injuries are common. **These types of injuries can cost tens of thousands of dollars** if not more and negatively affect insurance premiums, safety ratings & reputation.

Sets Up In Seconds, Adapts, Adjusts & Makes It Easy!

The LidUp system is comprised of 4 components, which allow the user to choose the best setup based on the lid design in the work zone. The lifting components incorporate our proprietary **Lift-2-Lock™ technology** which requires no hardware to set up or adjust. Simply attach the **magnets, hooks** or combination there of to the lid, slide the **spreader bar** into the lifting eyes, insert the cart lifting hook into lifting eye on the spreader bar and lift!, The spreader bar locks into the tops of the lifting eyes and will not shift or slip. Each of the magnet lifting components provide just over **800 LBS of pull force**, thats **1600 LBS of magnetic pull force** using two. Magnets are easily removed using the spreader bar to pry them off the lid with only a few pounds of upward leverage. Hooks can be used in side pick holes to break the seal between the lid and ring and can be used in conjunction with a magnet on the opposite side of the lid for lifting. The spreader bar is laser cut out of stainless steel to avoid being attracted to the magnets. The spreader bar is stowed on the side of the cart for easy transport and to prevent loss. The magnet and hook lifting components come in a rugged, lockable, air and watertight storage case.

Features & Benefits

- ▲ Hands, fingers and feet away from pinch points
- ▲ Greatly reduce potential for back injuries
- ▲ Reduces the possibility of trips, slips and falls
- ▲ Safe and easy single person operation
- ▲ Lift-2-Lock™ adjustable no slip, locked in lift
- ▲ 1600 LBS of magnetic pull force!
- ▲ All adjustment pins are affixed to the cart
- ▲ Go from truck to ready for use in seconds
- ▲ Cart adjusts to fit most any user size
- ▲ Way, WAY cheaper than an ER or Hospital visit!
